

COMPRESSPORT®

2012

MELISSA ROLLISON
IM 70.3 WORLD CHAMPION 2011

It's all about Passion...

Everything in Compressport is about passion...

Passion in training, Passion for extreme races, Passion to push the limits. Passion goes along with deep respect for YOU, professional athletes that lead the way in performance and age group athletes who are out there every day juggling between their family/ work commitments and their passion for sport.

Passion for the quest of perfect product...Always looking for more improvement, more preciseness, more exclusivity.

Since the launch of our first R2 calf sleeves in 2008, we work everyday for this consuming passion that Compressport has become.

Our goal has always been to become the reference product without ever compromising our identity and quality. The response and feedback we've received so far shows we are going in the right direction. Who would have believed it: It has only been 3 years and the brand is already in more than 25 countries...

5 World Championship titles...We thank those amazing athletes for their trust and we are proud to be part of their story.

And the passion continues every day with more and more extreme techno-fashion products. There is no room for futile accessories, everything is imagined, calculated and developed to enhance performance.

All our products are 100% European made (R&D, fibres, knitting, assembly, dying, testing,...)

- Our products are tested in the toughest conditions we can find (Abu Dhabi, Hawaii, Mont Blanc, Sables...) which is where the toughest races in the world take place.
- Because we want to be there, face to face with you and all the other athletes, we are present at all the major races around the world in more than 25 countries.

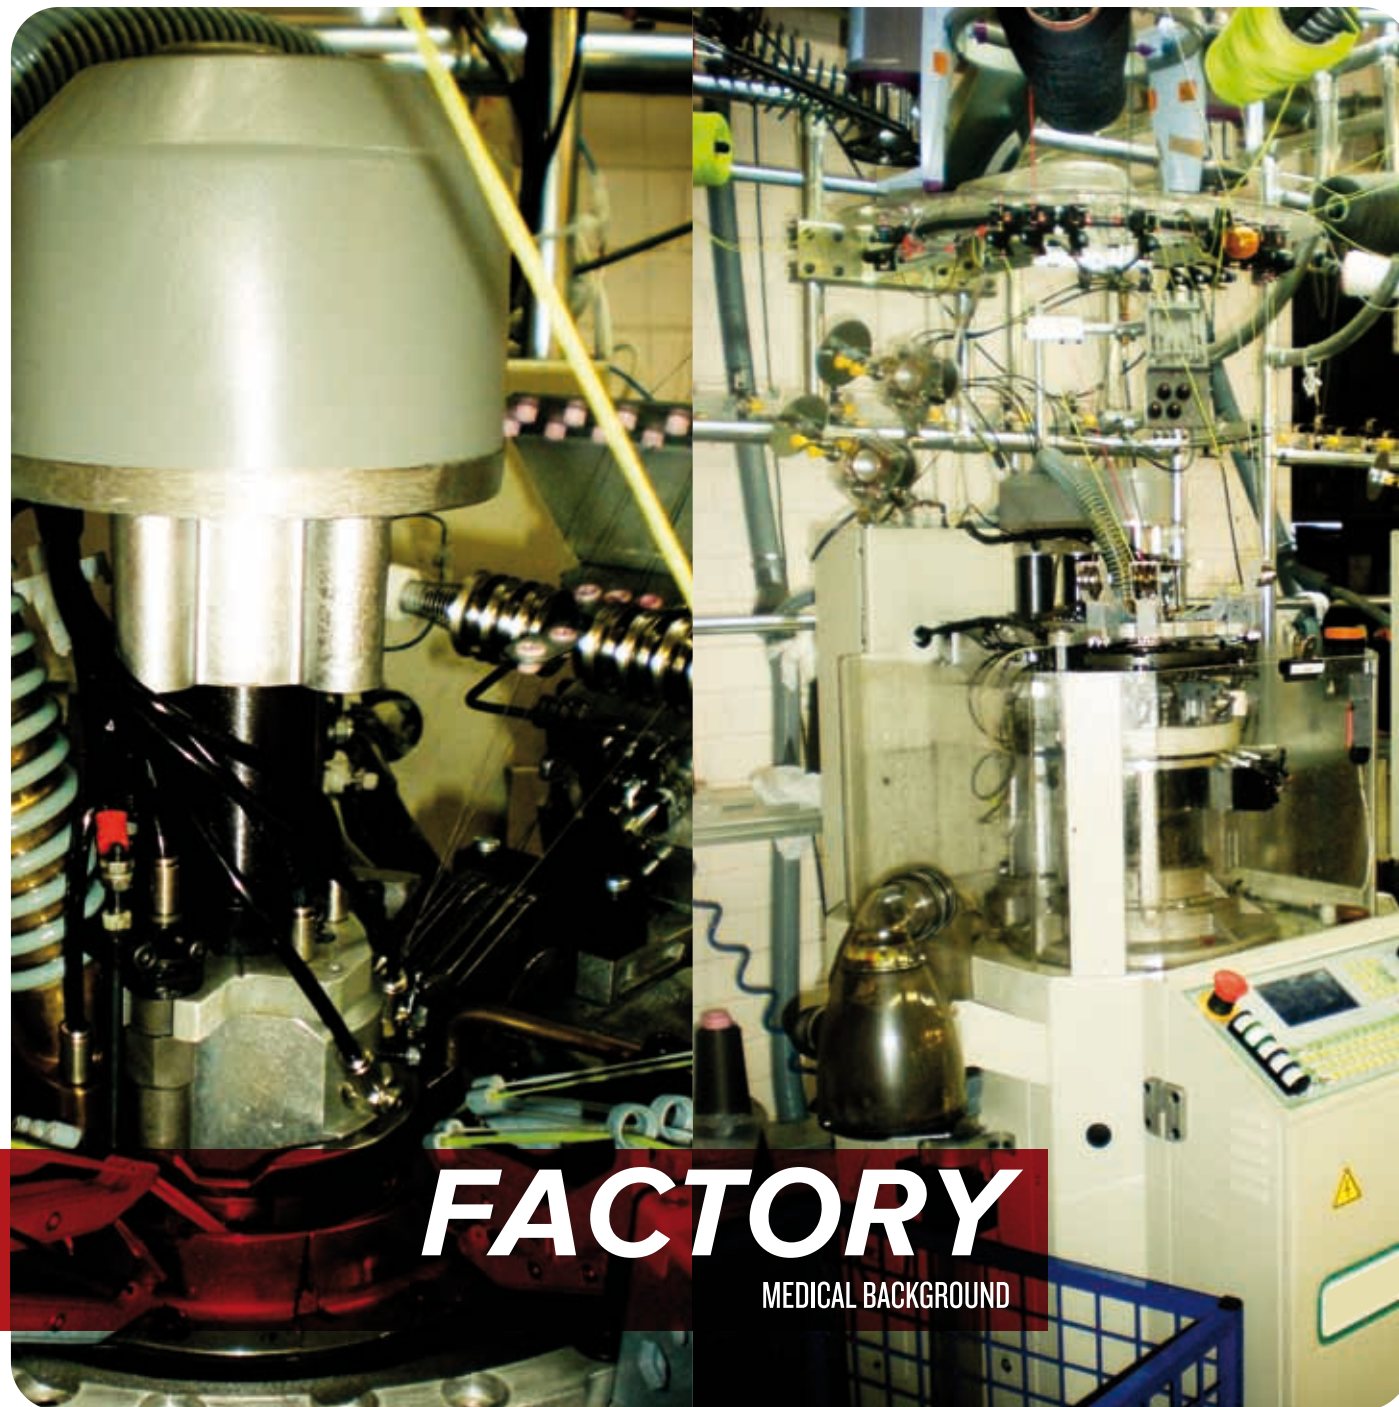

Thank you for your trust in our brand and thank you for the positive feedback we receive on a daily basis.

See you soon whether it is at the start of an ocean swim or at 8000m altitude.

I'm off for a run...See you!

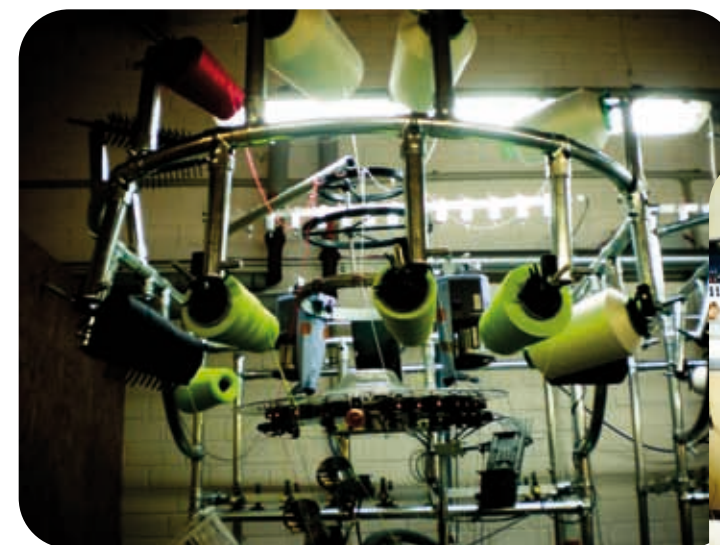

SYLVAIN LAUR
FOUNDER OF COMPRESSPORT

FACTORY

MEDICAL BACKGROUND

COMPRESSPORT®, a high-end quality product with a medical background.

We are proud to be a 100% Swiss company with 100% European made products.

Our products are designed and developed in Europe.

The machines we use are 100% European made.

The yarns / dyes used are 100% European.

All our products use fabrics and yarns that meet the Oeko-Tex ® Standard 100: Independent controls on harmful textile substances to make sure the products do not pose any health risk.

Our products are born from the collaboration between doctors, athletes and manufacturers specializing in medical compression.

Our manufacturing processes guarantee the suitable level of compression for the use of the product.

The machines used are specifically able to graduate to the millimetre different compression zones on targeted muscle areas.

Throughout the production cycle, the machine runs check to verify the compression of the product being produced.

We use the Salzmänn group in Switzerland for the measurement and validation of compression classes on all our products. The Salzmänn test apparatus is internationally recognized as the unit leader and technically the most accurate for measuring compression.

In just 3 years, COMPRESSPORT® has redefined the compression apparel market...

Coming from a medical research background and specialist in sports compression, our range of products is like no other. Combining the highest technologies with the latest trends, our aim is to always innovate and surprise our athletes. We respond to the problems that athletes face daily. Whether to improve performance, enhance recovery or to help them travel in the best possible conditions. Compressport contributes to improve the overall well-being of the athletes in their everyday life. We now have over 500 professional athletes endorsing and using our products on a daily basis.

Current and past world champions wear COMPRESSPORT® products.

Before being released, all our products are tested by all those top level athletes who give us their insights and feedback. This ensures our products meet exactly the needs of the athletes.

During the development of a product, every aspect is examined in details. We study the morphology of athletes, we test hundreds of different yarns and fabrics, we work on seamless constructions to maximise the efficiency and lifetime of the product, we test the compression rates during the production phase.

R2

THE BEST SELLER, THE ULTIMATE COMPRESSION

R₂ (race&recovery)

MASSAGINGFIBRE

Every movement triggers a micromassage providing well being and lightness. Patented fibre.

SHOCKABSORBER

The 360° compression around the whole calf absorbs the "shock wave" effect on muscles, veins and joints.

ULTRALIGHT

Wet or dry, COMPRESSPORT® probably remains the most lightweight (does not retain water).

ULTRARESIST

In normal use COMPRESSPORT® is tear-proof.

DTOX

Studies show a significant reduction in lactic acid during effort.

ANTI-FATIGUE

The shock and vibration absorption on muscles, veins and joints increases resistance to effort.

RECOVERY

No pain after strain! COMPRESSPORT® is used for recovery after showering (in a plane, at the office, at home)!

QUALITYGUARANTEE

COMPRESSPORT® guarantees the exchange of your product. (see conditions on our website <http://www.compressport.com>)

R2 “Race & recovery”

During effort, COMPRESSPORT® reduces lactic acid and shocks. COMPRESSPORT® protects you from muscular fatigue and damage. After effort, COMPRESSPORT® speeds up recovery and leaves you feeling great. “30-day Satisfied for Reimbursed” guarantee. Try it, even by curiosity!

Intense effort with COMPRESSPORT®

Its compression actions reduce greatly the accumulation of toxins round the leg area, especially when the effort is prolonged. The sheathing calf allows a more efficient venous feedback from feet to the heart and a better oxygena- tion thus facilitating muscle recovery during exercise.

COMPRESSPORT®, muscular-tear prevention

The COMPRESSPORT® fibre is designed to reduce shock waves generated by running on hard ground. It therefore significantly reduces the oscillating movement of the muscles (muscle fibres), slowing down muscle fatigue thereby limiting risks of injury.

COMPRESSPORT® for your recovery

After sport COMPRESSPORT® accompanies you throughout your recovery so you can regain light feeling legs, ready for another training session.

RECOVERY

No pain after strain! COMPRESSPORT® is used for recovery after showering (in a plane, at the office, at home)!

INTELLIGENT TEXTILE

UR2 are the first to boast the new "micro-encapsulated textile" technology. Millions of micro-capsules of ORGANIC essential oils are embedded in the textile constantly releasing their active ingredients onto your legs. The gradual compression associated with the encapsulated essential oils is the new winning dual action to ensure well being to your legs!

MARCEL ZAMORA
CHAMPION IM NICE 2006 - 07 - 08 - 09 - 10

UR2 "Ultrarace&recovery"

COMPRESSPORT® innovates yet again by offering you COMPRESSPORT® UR2 (Ultra Race & Recup). Ideal for those who go the whole way and more (Marathon, Ultra, Iron-Man, etc). Every centimetre of fibre is loaded with Thousands of capsules containing 6 essential oils renowned for their soothing and myorelaxing virtues. Make the most of the exclusive dual action Compression + microcaps with essential oils to boost your performance and recovery even further.

COMPRESSPORT® for your recovery

US
ULTRA SILICON

MASSAGING FIBRE

Every movement triggers a micromassage providing well being and lightness. Patented fibre.

CHOC ABSORBER

The 360° compression around the whole calf absorbs the "shock wave" effect on muscles, veins and joints.

ULTRALIGHT

Wet or dry, COMPRESSPORT® probably remains the most lightweight (does not retain water).

ULTRA RESIST

In normal use COMPRESSPORT® is tear-proof.

QUALITY GUARANTEE

COMPRESSPORT® guarantees the exchange of your product. (see conditions on our website <http://www.compressport.com>)

DTOX

Studies show a significant reduction in lactic acid during effort.

ANTI-FATIGUE

The shock and vibration absorption on muscles, veins and joints increases resistance to effort.

RECOVERY

No pain after strain! COMPRESSPORT® is used for recovery after showering (in a plane, at the office, at home)!

SILICON ABSORBER

US® is the latest in the COMPRESSPORT® range. With its 220 soft silicon spikes which fully surround the ankle over a height of 7cm, US® optimises shock absorption and guarantees ideal support to the Achilles tendon throughout strenuous effort (helping absorb pain and tendon problems). The COMPRESSPORT® US® is a major leap forward in the compression world.

PATRICK VERNAY
9-TIMES IM CHAMPION

US “Ultra silicon”

COMPRESSPORT® is for everyone
COMPRESSPORT® is ideal for all sports (Triathlon, Trail/Road Running, Road/Mountain Biking, Football, Gym). COMPRESSPORT® will be your partner of choice for all your training, racing and recovery needs.

Intense effort with COMPRESSPORT®

COMPRESSPORT® increases efficient venous feedback from your feet to your heart, reducing the accumulation of toxins while increasing oxygenation to the muscles. The US also greatly reduces impact shockwaves and muscle oscillation which helps prevent injury and reduces muscle fatigue. Compressport allows you to push your limits!

COMPRESSPORT® reduces muscle fatigue

COMPRESSPORT® after exercise continues to boost your venous feedback, this improves recovery time, so you can train more often.
There is no need to machine wash your Compressport after each use.
Hand wash in the shower and put them straight back on.
Recover faster with Compressport!

DTOX

Studies prove a significant reduction in lactic acid build up during prolonged effort.

ANTI-FATIGUE

Shock and vibration absorption helps guard against injury and fatigue.

RECOVERY

Significant benefits can be gained from the increased venous feedback by wearing your COMPRESSPORT® in recovery.

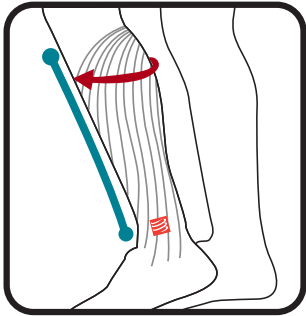

US White

US Black

The COMPRESSPORT® US® is a major leap forward in the compression world.

Advantages +

The Compressport US® is your "Recovery" partner after intense effort, allowing you to be fresh for your next training session. Virtually indestructible, your Compressport US® can be stretched several times its size and recover its original shape. Compressport US® resists both chlorine, or acidity due to perspiration and salt. Use your Compressport US® "incognito" with long pants or "fashion" as the "pros" in shorts and thongs. Being footless your Compressport US® is more hygienic (no need to wash each session), which prolongs its life.

THIERRY BREUIL
FRENCH TRAIL RUNNING CHAMPION

FORQUAD

THE REVOLUTION

(FORQUAD)

MASSAGINGFIBRE

Every movement triggers a micromassage providing well being and lightness. Patented fibre.

SHOCKABSORBER

The 360° compression around the whole quad absorbs the "shock wave" effect on muscles, veins and joints.

ULTRALIGHT

Wet or dry, COMPRESSPORT® probably remains the most lightweight (does not retain water).

ULTRARESIST

In normal use COMPRESSPORT® is tear-proof.

QUALITY GUARANTEE

COMPRESSPORT® guarantees the exchange of your product. (see conditions on our website <http://www.compressport.com>)

DTOX

Studies show a significant reduction in lactic acid during effort.

ANTI-FATIGUE

The shock and vibration absorption on muscles, veins and joints increases resistance to effort.

RECOVERY

No pain after strain! COMPRESSPORT® is used for recovery after showering (in a plane, at the office, at home)!

TRANSFORMER CONCEPT

Wear the FORQUAD with your training and race kits. Transforms your outfit to the required compression.

BORJA GOLÁN
SPAIN CHAMPION SQUASH 2011

QUAD... "the Revolution"

Revolution for all lovers of sport who use their legs to push the boundaries of their sport. Cycling, running, road and mountain, the new "Quad Compressport" will give you wings!

The intense effort with COMPRESSPORT®
Selective compression on the area of the quadriceps gives you a feeling of lightness and cleanliness kilometer after kilometer. You push away the feeling of fatigue and heaviness and recover during your effort and réattaquez peaks stronger with each relance. Wear your "Compresport Quad" incognito (like a leg warmer) under your cycling short, your short and feature tri club or take the Australian touch with your Compressport Quad under your running shorts.

COMPRESSPORT® , anti-sensitive muscle
As the range Compressport, the Techno-COMPRESSPORT® fiber helps reduce the shock waves on hard ground. It helps to reduce significantly the oscillatory movement of the muscles (muscle fibers), pushing the limits and muscle fatigue, therefore, the risk of injury (cycling and running)

COMPRESSPORT® for your recovery
Once the activity is completed, you will accompany COMPRESSPORT® throughout the recovery and you'll quickly find the legs ready for new sporting challenges.

AG2R LA MONDIALE

F (F-LIKE FULL LEG)

MASSAGING FIBRE

Every movement initiates a micro massage ensuring well being and lightness. Patented fibre.

HIGH PRECISION TECHNOLOGY

Special circular weave ensuring excellent pressure distribution over every cm² of the leg.

ULTRALIGHT

Wet or dry COMPRESSPORT remains probably the lightest (does not retain water).

ULTRA CONFORT

Woven fibres renowned for their softness and comfort.

CYCLING

More force, more resistance during effort and outstanding during recovery, FULLLEG by COMPRESSPORT is a must-have for road and mountain bike cyclists.

EVACUATION

Optimum inside and out heat exchange with optimised perspiration evacuation.

PAIN KILLING

Ideal for eliminating muscle and joint pain.

RECOVERY

Accelerates venous return preventing blood from stagnating in calves, ischia and quadriceps therefore making your legs feel ultra light.

RUNNING

R2 + FORQUAD efficiency + optimisation of the position of the knees when track, road or trail running, FULLLEG is also the ideal heat regulator between seasons.

QUALITY GUARANTEE

COMPRESSPORT® guarantees the exchange of your product. (see conditions on our website <http://www.compressport.com>)

FULL LEG White

FULL LEG Black

FULL LEG “F-like”

You feel it immediately! Feeling of well being, lightness and strength surrounding your legs from the ankle to the groin. The new FULL LEG will be your must-have training partner come summer or winter.

The FULL LEG is your second-to-none training and recovery aid.

Wear it as a leg warmer in autumn, winter and spring. It will protect you from the cold as well as offering you incredible compression.

Wear it under shorts for maximum recovery in the summer after full-on sessions. FULL LEG COMPRESSPORT® offers you both the beneficial effects of an R2 and a FORQUAD.

RECOVERY

Accelerates venous return preventing blood from stagnating in calves, ischia and quadriceps therefore making your legs feel ultra light.

PAIN KILLING

Ideal for eliminating muscle and joint pain.

EVACUATION

Optimum inside and out heat exchange with optimised perspiration evacuation.

HIGH PRECISION TECHNOLOGY

Special circular weave ensuring excellent pressure distribution over every cm² of the leg.

ULTRALIGHT

Wet or dry Compressport® remains probably the lightest (does not retain water).

ULTRACOMFORT

Woven fibres renowned for their softness and comfort.

CYCLING

More force, more resistance during effort and outstanding during recovery, FULL LEG by Compressport is a must-have for road and mountain bike cyclists.

RUNNING

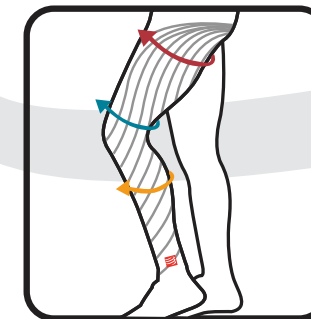

R2 + FORQUAD efficiency + optimisation of the position of the knees when track, road or trail running. FULL LEG is also the ideal heat regulator between seasons.

FULLSOCKS

F-LIKE

(FULLSOCKS
COMPRESSION)

ULTRARESISTANT

In normal use FULLSOCKS are tear proof.

ANTIFATIGUE

Absorption of shocks and vibrations to muscles, veins and joints increasing the possibilities of resistance to effort.

ULTRACOMFORT

Woven fibres second-to-none for their softness and comfort. The FS3DD offers you outstanding comfort.

GRIP3D.DOT

The 3D.DOTS are multidirectional ensuring maximum grip in shoes thereby preventing feet from slipping during full-on effort.

ACUPRESSURE

"The massaging acupressure" is designed to activate blood circulation by multipoint massaging of the sole area.

THERMOAERATION

Air enters the 3D.DOTS preventing overheating of the sole of the foot during effort.

RECOVERY

Ideal for recovery after effort and also for long-haul flights or long car trips.

RUNNING

For road or trail running, the new FS3DD offers you the beneficial effects of compression and support of the ankle and stimulation of the arch of your foot.

CYCLING

FS3DD is the indispensable recovery weapon for cyclists. It was the must-have during the 2010 Tour de France.

ARCHSTIM

Located in the arch of the foot, this also ensures venous return and recovery.

QUALITYGUARANTEE

COMPRESSPORT® guarantees the exchange of your product. (see conditions on our website <http://www.compressport.com>)

FULL SOCKS “F-like”

FULLSOCKS combine all the latest technologies in one sock ensuring athletes the best effects during effort while making the most of maximum recovery afterwards.

ULTRARESIST

In normal use FULLSOCKS are tear proof.

ANTIFATIGUE

Absorption of shocks and vibrations to muscles, veins and joints increasing the possibilities of resistance to effort.

ULTRACOMFORT

Woven fibres second-to-none for their softness and comfort. The FS3DD offers you outstanding comfort.

PRORACINGsocks

WITH 3D.DOTS TECHNOLOGY

ProRacingSocks with D-dot

ANATOMICAL DESIGN

Specifically designed for right and left feet to reflect the anatomy of each foot, offering improved support and performance.

SHOCKABSORBER

The external over-woven structure of the 3D.DOTS allows for absorption and dampening of impact.

THERMOAERATION

Air flows easily between the 3D.DOTS, regulating temperature

ARCHSTIM BLOOD CIRCULATION

Positioned under the arch of the foot, this elasticated strip stimulates venous return and reduces slipping of the foot inside the sock.

TOTALWATER EXTRACT

The 3D.DOTS retain little moisture (rain, hydration, perspiration) and the space between them facilitates its extraction so feet stay drier.

ANTIBACTERIAL

Silver ions built into the fibre help to control heat and moisture, reducing odour and the risk of blisters.

ERGOFIT TECHNOLOGY

The toe piece contours and covers the toes without creasing, compressing or smothering the foot.

ACUPRESSURE

The massaging acupressure effect of the 3D.DOTS helps to stimulate blood circulation around the sole of the foot.

ACHILLESTENDON

The cushioning effect of the 3D.DOTS at the rear of the sock protects the Achilles tendon by reducing friction and pressure from the shoe.

GRIP3D.DOTS

The multi-directional 3D.DOTS ensure maximum grip, preventing the foot from slipping inside the shoe.

BIKE RUN TRAIL
proracingsocks 3D.DOT

PRO RACING SOCKS “With 3D.Dots Technology”

360° design to offer trailers a new generation ultra technical sock. Extremely light and exceptionally invigorating, the COMPRESSPORT T. Sock acts both on posture hold and activation of microcirculation. Its wide and ergonomic toe piece, the stimulation of the arch of the foot, the 3D dots and the multi-compressive fibres will give you aggression and comfort during effort. The 3D dots also offer you a second-to-none shock-proof/breathing combination namely at the malleolus and Achilles tendon. Water is not stored in the protective cushions which guarantees you dry feet. The silver ion treatment is a bonus against perspiration and the spreading of bacteria. Your T. Socks are guaranteed for 2 years.

HEEL TAB

Facilitates positioning in the sock and ensures optimum positioning of sock.

GRIP3D.DOTS

The 3D.DOTS are multidirectional and ensure maximum grip in shoes thereby preventing feet from slipping during effort.

ACHILLES TENDON

The 3D dots at the rear of the sock protect the Achilles tendon due to their “cushion” effect thereby preventing friction and pressure from the shoe.

ACHILLES TENDON+MALLEOLUS PROTECT

The 3D dots at the rear of and inside the sock protect the Achilles tendon and malleolus thanks to their “cushion” effect.

ACUPRESSURE

"The massaging acupressure" is designed to activate blood circulation by multipoint massaging of the sole area.

ERGOFIT TECHNOLOGY

The toe piece contours and covers the toes without creasing, compressing or smothering the foot.

SILVER ANTIBACTERIAL

The silver ions built into the fibre prevent perspiration and heating thereby eliminating odours, mycosis and blisters.

SHOCK ABSORBER

The external overwoven structure of the 3-D dots allows for adsorption and dampening over the shock areas.

ANATOMICALLY CORRECT

Specially designed for right and left foot in order to adhere to the anatomy of the foot and maintain your performances.

THERMOAERATION

No heating, no risk of blisters as the air flows easily between the 3-D dots.

ARCHSTIM BLOOD CIRCULATION

Located in the arch of the foot, it also provides for venous return and recovery.

TOTAL WATER EXTRACT

The 3-D dots do not retain water (rain, hydration, perspiration) and facilitate its discharge. Feet stay dry.

DUAL ACTIVE COMPRESSION

The progressive compression acts on both muscular zones of your arm. Improved venous return and shock absorption is guaranteed along the entire arm length.

PERFORMANCE

During exercise, the stimulation of blood flow increases oxygenation to the muscles. Your arms feel lighter and less strained.

ULTRALIGHT+ULTRARESIST

Your COMPRESSION® Proracing Armsleeves do not retain water and will remain featherlight in all conditions. During normal use, your Armsleeves are tear-proof.

RECOVERY

Reduce muscle soreness, eliminate lactic acid and enhance your recovery by wearing your Proracing Armsleeves after showering (at home, in the office, on a plane,...)

ANTIBACTERIAL

100% hygienic. The SANITIZED® treatment helps to prevent the growth of bacteria and naturally fights odours. It ensures a feeling of freshness all day long.

MULTISPORT

Your Proracing Armsleeves are ideal for Running, Trail Running, Cycling, MTB. Use them for your recovery after swimming, a gym session or everyday as an effective UV protection garment.

MASSAGING FIBRE

Each movement triggers a micro massage providing a sensation of lightness and well-being. Patented fibre.

SHOCK ABSORBER

The 360° seamless compression around the arm absorbs the "shock wave" effect on muscles, veins and joints. Less vibrations means delayed muscle fatigue. Your resistance to prolonged exertion is enhanced!

COLDBLACK® - UV Protect

The COLDBLACK® treatment reduces heat build-up: the textile stays cool to the touch; the wearer perspires less, feels better and is capable of greater performance. It also provides reliable protection from UV rays and guarantees a minimum UPF 30 protection.

THERMO REGULATION

The special knitting protects you from the cold and windchill whilst still providing maximum breathability for your skin. The activation of microcirculation assists and supports the skin's thermo-regulating mechanism, therefore allowing you to save energy.

MORPHOFIT

100% seamless, your Proracing Armsleeves are knitted to fit every curve of your arms perfectly, maximising their efficiency and comfort (no chafing).

PRO RACING ARMSLEEVE "Compression"

The **COMPRESSPORT® ProRacing Armssleeve** will become your new ally for every ride or race.

Our targeted **Progressive compression** guarantees improved **venous return** and **shock absorption** along the entire arm length. Blood circulation is improved, muscle vibration reduced, thus saving you energy during the effort.

Wearing your ProRacing Armsleeves after exercising will improve your recovery by reducing muscle soreness and eliminating lactic acid. The 360 degrees **SEAMLESS** construction will guarantee a perfect fit. The elbow area has a specific non-compressive fabric for enhanced comfort.

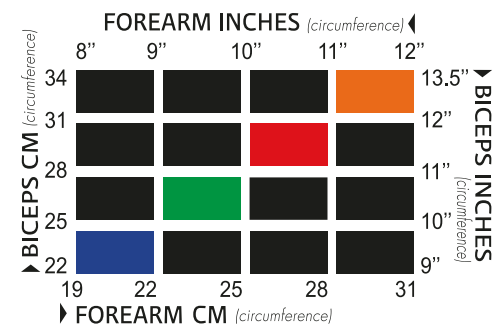

Coupled with this is the effective **temperature regulation**: the **COLDBLACK** treatment prevents the body and the armsleeve heating up and guarantees a UPF of at least 30. In hot condition, your body does not have to expend energy to balance out the higher temperature. The special knitting also protects you from the cold and windchill. In any conditions, your ProRacing armsleeves are an easy way to regulate your arm/core temperature for any outdoor sport.
